➤ Dell – Strategized and Led AI-Design TransformationCoE for Dell’s Design Org (Dell Digital Design) ➤ Lead of winning team - President & Game changer awards for designing GenAI Chatbot for Dell.com; also won “ET Digital Healthcare Platform of the Year - 2022” for the flagship “Digital Life Care” product ➤ Received Dell Champion Award for providing innovative, forward-looking solutions for DSA (Dell Sales Application) ➤ 8 granted Patents & 8 Technical Publications on Design Systems, Design Layout, UI, Cost-effective Printing, Cloud Printing, Print Automation, Retail Shopping and Mobile Security ➤ HP - Director Award (APJ region) for Process Improvement: 40% cost savings to the Global Business Units (GBUs) by suggesting design improvements to reduce incoming defects (Change Requests) ➤ Won HP-Hackathon (RHoK) 2013-14 for giving the best idea and implementation details for a Social Cause	➤ Certified SCRUM Master (CSM) -2016 ➤ Prince2 Certified -2015 ➤ PG Diploma in Finance: St. Joseph’s College of Commerce, Bangalore, 2011 ➤ Oracle Certified Database Associate: 2009 ➤ NCFM certification (Secondary Markets): NSE ➤ M.Sc. (IT): Jamia Hamdard University, 2004-2006 ➤ B.I.S (Bachelors in Information Systems): Indraprastha University (Delhi): 2000-2004

Occupational Contour

Total Work Experience: **19.7 years**

Dell Technologies – 7.7 years (Aug 2018 – March 2026)

Designations held:

Global Design Practice Lead: AI/ML, ecommerce

(May 2021 – March 2026)

Sr. Design Manager & Strategist: Personalization at Scale

(August 2018 – May 2021)

Responsibilities:

- **GenAI based Personalization:** Led & implemented Pan-Dell design initiative to leverage GenAI, Analytics & Behavioural Science nudges for enhancing Business RoI & User Delight. Involved in AI research, prompt libraries, intent estimation and multi-modal adaptive layouts. Reduced **AI-token cost** using a mix of behavioural and tool-based nudges.
- **Partnered with Verticals and Built Relationships:** Understanding Vertical and Geography specific needs to create frictionless, adaptable solutions. Partnered with Designers, PMs, Engg SMEs & Sales for Design Awareness, Business Intakes & Driving outcomes. Regular internal/external presentations & asynchronous communication in leading strategy and execution for multiple experiences.
- **Brought Consistency, Alignment in Design Practices:** Coached Designers on Design Thinking techniques, Stakeholder Communication, Negotiation and Story-telling skills. Crafted e2e customer journeys for Future State Platform for Sales and Customer-Satisfaction (CSAT). Conducted extensive research in B2B & B2C space to develop strong use-cases and behavioural patterns for tapping new market opportunities.
- **Managed 4 experiences, with 15+ Designers, across 5 time zones:** Drove design strategy across AI & e-commerce PoDs. Interviewed, on-boarded, trained and strategized for multiple products lines, facing millions of customers. Prepared 3-6-9 month deliverable plans, mentored designers for 6 months w.r.t People, Process & Technology. Continuous focus on metrics, to drive quantifiable business outcomes.

Boeing India Corporation – 1.7 years (Nov 2016 – Jun 2018)

Designation: Senior Product Designer / User Experience Specialist

Responsibilities:

- **Research, Evaluation, Conducting Design Sprints, Prototyping & Reviews:** Responsible for managing end-to-end design functions and overall User Experience of Fuel Efficiency Solutions (FES) and TAAM (Total Airspace and Airport modeller) products. Conducted sprints to tackle critical business questions through rapid prototyping, and testing ideas with stakeholders. Prepared lo-fi, hi-fi prototypes for development team. Performed heuristic evaluation and usability reviews.

Software AG R&D – 11 months (December 2015 – November 2016)

Designation: Senior User Experience Designer

Responsibilities:

- **Designing/upgrading UX for Enterprise Applications, Corporate Branding Guidelines:** Designed workflows for Enterprise Applications (One Data & Eclipse Designer) to give them a modern and trendy feel. Involved in preparing a common layout and design language to be used for Internal & External corporate branding and product interfaces.
- **Conducting Design Thinking Workshops:** Applied methods such as Train-the-Trainer, Crazy 8s, 6-WHYs and Think-Aloud to make developers aware of design thinking processes and using the same for achieving desired results for efficiency and effectiveness of enterprise solutions.

Hewlett Packard R&D – 9.5 years (July 2006 – December 2015)

Designation: Design Engineer II

Responsibilities:

- **Requirements Gathering, Conceptualizing UX:** Collected and developed available product information in ways that was most useful to customers/service organization – feature localization to fit Indian Market requirements. Researched and gathered customer requests. Conceptualized UX based on GBU design standards (HP One Voice). Provided innovative solutions to accommodate more text and better design for small-sized screens of low-end devices.
- **Prototyping Workflows:** Prepared digital mock-ups for mobile and desktop workflows to assist firmware teams in understanding user journey. Designed UI solution flows for various features such as Copy , Print, Fax & Connectivity for product lines like Consumer Inkjet, SMB based Printers & Large format printers .

Technical Skills

- Web technologies/languages: HTML5, CSS, SQL, Prompt engineering
- Operating Systems & Databases: Ubuntu, Redhat, Windows, Oracle 8i, 9i
- Tools: Claude, chatGPT, Gemini, Claude, Miro, Lovable, Photoshop, Figma, Pencil, Proto, Axure, Balsamiq, Sketch,
- Version Control Tools: Git, Svn, Quality Center (ALM)
- Development Models : Pivotal, POD, Agile, Scrum, Kanban, Waterfall

Professional Skills

- Setting up & Managing Teams, defining ground rules & design processes for customer and stakeholder engagement - for design-driven user & business KPIs/outcomes
- Preparing Solution Strategy (Filling technical gaps in workflows based on customer requirements)
- Representing team & Org in executive-level presentations & strategic-discussions
- Designing and Conducting **Design Thinking** workshops applying industry-specific methods and examples

Major Strengths & Areas of Interest

- Effective Interpersonal and Communication skills.
- Staying abreast with the know-how of cutting-edge technologies
- Eye for detail, ability to learn new trends quickly.
